Node.js

HTML

CSS

Python

REACT

Express

MongoDB

SQL

NoSQL

GitHub

Heroku

## EDUCATION

Software Engineering Certificate  
General Assembly  
Remote | 2021

## PROFILE

I am a junior full stack web-developer that specializes in front-end mobile first development. I have used my skills as a developer in a contract position where I helped create reports and custom displays for statistics and metrics. These tools were used by major companies to gain insight into their business operations.

## PROJECTS

D&D 5th edition resources

1/2021

<https://shades-dungeons-dragons.herokuapp.com/>

Skills used: React, Node.js, HTML, Heroku

- A D&D site that categorizes and organizes an API.
- The project cycles through API calls to automatically pull until it reaches the information belonging to the selected category. This allows the user to search through the entire API for all information pertaining to D&D.
- Wherever the game is being played, players can have a categorized search site at their fingertips.

Personal Site

10/2022

<https://persprojfront.onrender.com/>

Skills used: Mongo, Express, React, Node.js, Git

- A simple Site to house all of my personal projects.
- Built with the focus on my resume and projects, specifically a place to find all of my projects.
- The reason I chose to host all of projects on this one site is so I can focus my financial resources in this one area, specifically when I upgrade databases and domains, This way, the upkeep cost will be lower and I can provide a better experience for less cost.

## EXPERIENCE

Data Analyst

Bear Logistics Solutions | Bullard, TX | 3/2022 - 9/2022

- Created custom reports that helped drive business decisions.
- Used my html and css knowledge to create custom displays for metrics.
- Learned and utilized different development tools such as Zoho Analytics and Zoho Creator, Microsoft Power Apps, alongside many other tools.
